Disaster Management Project

Date: 04/09/2023

Guide: Jinson Devis

1. Project Overview?

   - The Disaster Management Project aims to develop a comprehensive disaster management system that enables effective disaster preparedness, response, and recovery.

2. To what extent is the system proposed for?

   - The system is proposed to cover disaster management on a regional scale, initially focusing on natural disasters such as hurricanes, earthquakes, wildfires, and floods.

3. Specify the Viewers/Public who will be involved in the System?

   - The system will involve the following stakeholders:

     - Emergency Responders: Professionals involved in disaster response and recovery.

     - Public Users: Individuals seeking disaster information and resources.

     - Government Agencies: Entities responsible for disaster preparedness and response.

     - NGOs and Volunteers: Organizations and volunteers assisting in disaster relief efforts.

4. List the Modules included in your System?

   - The system will consist of the following modules:

     - Disaster Alerts and Notifications

     - Resource Management and Allocation

     - Incident Reporting and Tracking

     - Communication and Collaboration Tools

     - User Profile and Authentication

     - Administrative Dashboard

5. Identify the users in your project?

   - The project will involve Admins, Emergency Responders, Public Users, and Government Officials, each with specific roles and responsibilities.

6. Who owns the system?

   - The Disaster Management System is owned and operated by a consortium of government agencies, non-governmental organizations, and disaster management professionals.

7. System is related to which firm/industry/organization?

   - The system is related to the disaster management and emergency response sector, with potential applications in government agencies, humanitarian organizations, and local communities.

8. Details of the person you have contacted for data collection?

   - Data collection is overseen by the Disaster Management Coordinator, who currently on the system.

9. Questionnaire to collect details about the project? (min 10 questions)

   - (A detailed questionnaire for collecting project-specific information is attached separately.)

   - Additional documents, including project plans, resource allocation models, and disaster response protocols, are available upon request.
